

Dr. Markus Wyss visit 2017

Dr. Markus Wyss, CEO, Camag, Switzerland was in India, in the week of April 2017. This was his 4th visit to India, ever since he became the CEO, five years ago. India is an important market for Camag since HPTLC is extremely popular here.

Anchrom had arranged his presentations 2 in day time and 2 in the evening at Ahmedabad and Chandigarh.

The response was terrific. Chromatographers travelled hours to listen to him.

HPTLC practiced conventionally was instrumental TLC. But HPTLC today i.e. since Aug. 2015 is instrument TLC with each influential parameter under control by a specified SOP described in the USP and PhEur.

A copy of this presentation is available with us, on request.

Novotel, Ahmedabad

AMA, Ahmedabad

Lemon Tree, Chandigarh
